PROFILE SUMMARY

I am a Computer Science undergraduate with a strong interest in backend and full-stack development. I have hands-on experience building scalable web applications using Node.js, Express.js, and MySQL, along with modern tools like Drizzle ORM and Prisma. I have developed real-world projects featuring authentication systems, REST APIs, and AI-powered functionalities such as intelligent URL summarization. Currently gaining professional internship experience with Microsoft SQL Server on a Hospital Management System, focused on data modeling, master-data quality, and end-to-end testing (UAT). I enjoy solving practical problems, writing clean and maintainable code, and continuously learning new technologies.

EDUCATION

The NorthCap University	CGPA : 7.83/10
Bachelor of Technology in Computer Science (August 2022 – May 2026)	
The Genius Sr Sec School	Percentage : 80.6
Higher Secondary Education (July 2021 – May 2022)	
Secondary Education (July 2019 – May 2020)	Percentage : 89.8

INTERNSHIP

Full Stack Developer Intern, Techennia Infosolutions (April 2026 – Present)

- Worked on a modular Hospital Management System (HMS) built with ASP.NET Core, SQL Server, and React/TypeScript, focusing on database work, data modeling, and end-to-end module testing.
- Modeled the Hospital Equipment Master in SQL Server — equipment types vs. physical assets (~1,700+ types, ~200,000+ asset records).
- Wrote T-SQL for schema checks, data cleanup, duplicate consolidation, and source-traceable updates, incl. onboarding 19 OT equipment types.
- Performed end-to-end UAT for the Laboratory Information System (LIS) across receptionist, technician, pathologist, and admin roles.
- Diagnosed and documented defects during LIS testing (e.g., duplicate result creation, missing test-panel components) by correlating UI behavior with API responses and SQL data, and prepared persona-wise gap-analysis and UAT reports for mentor and stakeholder review.

Android Developer Intern, Aigetai Private Limited (June 2025 – December 2025)

- Working on Social Media App
- Gaining experience in Kotlin, Jetpack Compose , Data Integration.

PROJECTS

ChhotaLink : AI-powered URL Shortner Platform

- Built a scalable URL Shortener that converts long URLs into unique short links, with efficient redirection handling and duplicate shortcode validation using RESTful APIs.
- Implemented secure user authentication using JWT (access & refresh tokens), session management, and HTTP-only cookies, along with token-based email verification with expiry and resend email functionality.
- Integrated AI-powered URL summarization using Google Gemini API with asynchronous background processing to enhance user experience and reduce response latency.
- Designed and optimized backend using Drizzle ORM with MySQL for type-safe queries, efficient data handling, and robust validation using Zod with proper error handling and HTTP status codes.
- Developed dynamic frontend using EJS, including profile management, link tracking, and dashboard features, pagination, and responsive UI with improved UX features.

Tech Stack: Node.js, Express.js, Drizzle ORM, MySQL, EJS, JWT, Zod, Nodemailer, Gmail SMTP, Google Gemini API

Real-Time Chat Application

- Built a **real-time chat application** using a **microservices architecture** with separate **User Service** and **Message Service**.
- Developed **REST communication** between services using REST Templates.
- Integrated **Spring Cloud API Gateway** to centralize routing, load balancing, and request filtering.
- Set up a **Spring Cloud Config Server** to manage centralized configuration for all services.

Tech Stack: Java, Spring Boot, Spring Cloud, Spring Cloud Gateway, Spring Cloud Config, REST APIs, Microservices Architecture

Vyorius App : A video streaming app

- **Developed a drone video streaming app** that connects to real-time RTSP camera feeds, enabling secure and low-latency video playback using LibVLC.
- **Integrated custom video recording functionality** using FFmpegKit to manually record RTSP streams.
- **Implemented Picture-in-Picture (PiP) mode**, allowing users to multitask while the video stream continues in a floating window.

Tech Stack: Kotlin, Android SDK, LibVLC, FFmpegKit, RTSP, Video Streaming, Picture-in-Picture (PiP)

SKILLS SUMMARY

- **Languages :** HTML, CSS, JavaScript, Node.js, Express.js, MySQL, MongoDB, Prisma ORM, Drizzle ORM, Java, Jetpack Compose and Kotlin
- **Testing & Data :** Data modeling & normalization, master-data cleanup, UAT / functional testing, defect & gap analysis
- **Tools :** VS Code, Android Studio, SSMS, Git
- **Soft Skills :** Critical Thinking, Problem Solving and Time Management

CERTIFICATIONS

- **Internshala :** Introduction to Android
- **Apna College :** Java + DSA

ACHIEVEMENTS

- Secured **Rank 45** out of 9797 participants in Codequest#29 Coding Challenge by Naukri Campus.
